TOILET (S6ST)

Size: W-2700 x D-1800 x H-2030+405+450

Material: SS 304 Grade

Finish: Matte Finish

Designed for maximum convenience, efficient space utilization, and cost-effectiveness by providing both front and rear access for multiple users simultaneously.

The layout can be customized as dual-access toilet facilities, separate toilet and bathroom sections, or fully configured according to project requirements.

The toilet units can also be tailored with either Indian or European closet options to suit user preferences and application needs.

8 STATION

TOILET (S8ST)

Size: W-3600 x D-1800 x H-2030+405+450

Material: SS 304 Grade

Finish: Matte Finish

Designed with 14 stations and dual-side access to maximize user convenience, optimize space utilization, and enhance operational efficiency. The modular layout allows multiple users to access the facility simultaneously from both sides, making it ideal for high-usage environments. The units can be configured as toilets, bathrooms, or a combination of both, with customization options including Indian or European closet systems based on project requirements.

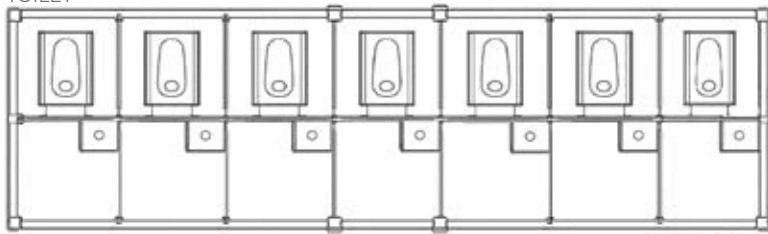

Manufactured using hygienically designed 304-grade stainless steel, the unit is durable, corrosion-resistant, easy to clean, and built for long-term performance. Ergonomically engineered for efficient space utilization, it offers enhanced user convenience while maintaining high standards of hygiene and aesthetics.

Suitable for universities, hospitals, event grounds, temporary program venues, exhibition halls, construction sites, and public gathering areas, the unit is designed for easy mobilization and relocation as required.
